PROFESSIONAL SUMMARY

Cum Laude Computer Engineering graduate with hands-on experience in IT disaster resiliency, business continuity documentation, and systems support, plus strong embedded systems and IoT skills. National IoT Skills Competition champion. CCNA-certified with Civil Service Professional Eligibility.

SKILLS

- Programming Languages: Python, C++, JavaScript, TypeScript, VHDL, Verilog, SQL
- Tools & Platforms: Git, Firebase, Supabase, Linux, ServiceNow
- Hardware & Embedded Systems: Arduino, ESP32, Raspberry Pi, FPGAs, Circuit Design
- IT Support & Compliance: Business Continuity Planning, Incident Response Tracking, System Documentation, Networking Fundamentals (CCNA)
- Office & Documentation: Microsoft Word, Microsoft Excel, Microsoft SharePoint, Technical Documentation

WORK EXPERIENCE

IT Resiliency and Business Continuity Intern, Philtech Inc.

July 2025 - September 2025

- Automated recurring departmental follow-up processes using Python, reducing manual administrative tasks.
- Bridged communication between IT Disaster Resiliency and SaaS application managers, using ServiceNow ticketing to audit system knowledge bases and publish updated documentation required for organizational compliance.

Cybersecurity Intern, Safeway Philtech Inc.

August 2024 - November 2024

- Managed and updated comprehensive cybersecurity report sheets to track system vulnerabilities and incident responses.
- Contributed to the development of business continuity plans, ensuring all documentation met professional and technical standards.

EDUCATION

Bachelor of Science in Computer Engineering

2022 - 2026

Polytechnic University of the Philippines, Sta. Mesa Campus

- Candidate for Cum Laude honors
- Major in Big Data Analytics
- DOST SEI Scholar
- Consistent Dean's/President's Lister

RESEARCH UNDERTAKEN

ChickMate: AI-Integrated Chick Brooder

- Developed an automated, behavior-driven brooding system aimed to optimize chick welfare and reduce early mortality rates in small-to-medium poultry operations.

AWARDS AND ACHIEVEMENTS

First Place, DOST MIRDC 9th Metals and Engineering Skills Competition (IoT Category)

June 17, 2026

- Developed QuakeTrace Sentinel, an IoT platform that delivers real-time telemetry on environmental hazards and occupant presence to accelerate post-earthquake search and rescue operations.

CERTIFICATIONS

- CCNA: Introduction to Networks
- Civil Service Eligibility (Professional Level)
- Huawei ICT Academy GaussDB Course
- Digital Safety and Security Awareness
